Kissing Hand
Math and Literacy Stations

Thank you for downloading my kissing Hand set! I am so excited to be getting started with my blog and teaching store. As the school year begins I will be posting units for each month. I will also include pictures of my own Kinderbabies learning on my blog. I hope that you can use these activities with your own Kinderbabies!

I love to store my units in folders, envelopes or bags. For this reason I have included a cover sheet for each activity with ideas and directions for use. If you need a more specific type of label to organize your units, please let me know!

I also suggest that you laminate all activities to make them last. I usually back all my cards/papers with paper to create a thicker and sturdier product that lasts through the years. With each station I have also tried to include a non-colored activity if you are low on ink! Often I print both and either use together at a station or do whole group.

Feel free to email me with any questions at piercejayme@oz.com

Letter Match
Uppercase and lowercase match

Directions
For this station, students need to match up the uppercase and lowercase letters. They can just match the letters or you can teach them to play memory! I have also included a worksheet for students to cut and glue matching letters.

Mini Book
Simple sight word sentences

Directions
For this station, students need to color the pages, then cut out and attach with glue/staple.
I suggest introducing the story to students before having them attempt it on their own! I included a large color copy of the story to use whole group!

Missing Letter
Find the missing letter

Directions
For this station, students will find the missing letter! I like to use velcro on each piece so they aren’t flying everywhere. I also included a worksheet to practice the skill.

ABC Game
Uppercase and lowercase letters

Directions
For this station, each student needs a gameboard. They will draw a letter card, say the letter name or sound and find the corresponding letter on the gameboard. Students place a raccoon marker on the letter space. Whoever fills their gameboard first is the winner! I have kids play until all boards are full so everyone wins. I also included “freebie” cards that students use for any letter!

By: Jayme Pierce
kinderbabies.blogspot.com
Number Practice
Handwriting 1-10

Directions
For this station, students will be practicing writing numbers 1-10. Depending on the numbers you are working on, you may want to only use some of the sheets. I staple and prepare the books before students begin otherwise there is a huge mess of papers! You can either store the books to practice numbers at school or send books home for home practice!

Quantity
Numbers 1-10

Directions
For this station, students will be finding the quantity of numbers 1-10. Students will match numbers with the picture representation of the number. I have also included a worksheet for students to cut and paste raccoons to show the quantity of each number. This can be done at one station, different stations or as a whole group activity!

*Note: Images of raccoons for each row.*
Color Practice
Red, orange, yellow, green, blue, purple, brown, black and white.

Directions
For this station, students will be matching colored raccoons with the color word. The colored words are written in the corresponding color to help them recognize the word. As the year goes on, I change the words to black so students can read the word without additional help. I have also included a mini book where students must color in the raccoon!

Patterns
AB and ABA Patterns

Directions
For this station, students will be completing AB patterns, by cutting and gluing pattern pieces. I have also included blank pattern boards so students can create their own patterns. The first few weeks of school this simple pattern is what works with my students. If your students are ready for something harder, feel free to have them create more difficult patterns!

Number Dice Roll
Dice roll game

Directions
For this station, students will be rolling the dice to make their way across the game board. Students roll the dice and move a marker to the finish line. I model the game to show students they must roll the dice, state the number and then count out loud to the next spot. Depending on your students level, you can use numbered dice or regular dice with dots. I have put Chester and tree stumps along the board game to use as special spots. You can use however you like, but I have students that land on Chester go an extra turn and tree stumps, they must go back 2!
